PROJECTS

Asiatech Canteen — School project | Flask, Python
- Web app that lets students order food instead of lining up at the canteen, so they spend less of their break waiting.
- Applies data structures (queue, stack) and sorting and searching algorithms; deployed live on PythonAnywhere.

ChordApp — In progress
- Chord and music sheet app built for our church: editable sheet storage with transposing, a chord guide and Nashville number conversion.

YouTube Channel Analytics — School project | Excel
- Cleaned and analyzed a public dataset of about 1,000 YouTube channels in Excel to study what separates the biggest channels: category, country or channel age.

EXPERIENCE

Freelance Video Editor — 2023 – Present
Self-Employed
